Environmental and Outdoor Education
B.A.Sc.

Major
Bachelor of Applied Science
Applied Human Sciences
College of Education and Human Service Professions

The Bachelor of Applied Science (B.A.Sc.) in Environmental and Outdoor Education (EOE) familiarizes students with formal and informal outdoor education settings. It provides extensive training in outdoor education methodology and program delivery, with an emphasis on nature-based outdoor recreation.

The major prepares students for careers in the broad field of outdoor education, including adventure education, environmental interpretation, sustainability education, and environmental education. Graduates go on to work in a variety of settings, such as environmental education centers, natural resource agencies, nonprofits, adventure education schools, adjudicated youth facilities, and high adventure camps.

Why UMD

- Core degree components include outdoor education methods, physical skills development, program planning and delivery, management, evaluation, and principles of outdoor education and recreation.
- Development of outdoor skills.
- Students intern all over the U.S. and at many international sites (Australia, England, Finland, New Zealand).
- Theory/practice-based understanding.
- Awareness of the value of outdoor and environmental education as part of healthy lifestyles and as an avenue for fostering environmental sustainability.

Acquired Skills

- Effective outdoor instruction.
- Grounds and facilities management.
- Natural resource management for sustainability.
